

Flying onboard a Seaplane?

BE INFORMED, BE AWARE, AND BE PREPARED !

Before takeoff, read the safety briefing card and listen carefully when the pilot gives a complete safety briefing.

Make sure the briefing includes all the items below and ask questions about things that are not clear to you.

- Baggage limits
- Where baggage is stowed
- How the seat belts work
- How to know where you are in the plane no matter its position
- Where to find and how to use exits
- Where to find the emergency locator transmitter (ELT), survival kit, first aid kit, fire extinguisher, etc.
- Rules about using electronic devices
- Where to find and how to use life jackets
- Rules about smoking
- Exiting underwater (underwater egress)
