

ISO 9001:2015 CERTIFIED

CIVIL AVIATION AUTHORITY OF FIJI

PUBLIC NOTICE

Past trends have shown that there are a high number of aviation incident reports involving fireworks in the vicinity of airports received during the festive season.

Fireworks can be dangerous and for this reason, their use is strictly controlled. The public is warned that any fireworks activity that is directed at or towards aircraft, particularly during an aircraft's critical phases of flight such as take-off and approach to landing at an airport, could endanger the aircraft and lives of passengers on board.

Shooting or directing fireworks within proximity of aircraft flying, taxiing or parked is a serious breach of Fiji's Air Navigation Regulations 1981 and is a criminal offence. Any person who is caught shooting/directing fireworks at an aircraft shall be liable for criminal prosecution.

In the interest of Public Safety: -

1. **DO NOT** direct any firework activity at or towards any aircraft or airport;
2. If you see anyone directing firework activity at an aircraft or airport, **REPORT IT** immediately to the nearest Police Post;
3. **IT IS PROHIBITED** to operate any fireworks within 5 kilometers of the Nadi and Nausori International Airports **OR** within 3 kilometers of other Domestic Airports, **AND** beyond these 5km and 3km prohibited areas, the fireworks should not exceed a display height in excess of 61m (200ft) above ground level.

A Permission under *Regulation 78 (2)* of the *Air Navigation Regulations 1981*, may be obtained to conduct fireworks activity, subject to conditions specified by CAAF.

In this regard, during this 2022/2023 New Year's festive period, the use of fireworks within the 5km and 3km prohibited areas in (3) above shall **ONLY BE PERMITTED** between **0600pm Saturday 31st Dec 2022 and 0200am on Sunday 01st Jan 2023, PROVIDED** such fireworks displays are restricted to areas **outside 500m on either side of the approach and take-off path from any airport runway** and is kept **below 61m (200ft) above ground level**.

Any proposed fireworks activity within this restricted area must be coordinated with the Civil Aviation Authority of Fiji (CAAF) for assessment and determination of the degree of hazard to air safety the activity will impose.

A CAAF fireworks permission does not cover permits/approvals required by other organisations for a fireworks display.

For any clarification, please contact CAAF's Ground Safety Department on email:
